

JOIN THE CORPS

The Sustainability Institute's **Environmental Conservation Corps** is an AmeriCorps accredited workforce development and service-learning program for young adults pursuing careers in conservation and environmental fields. Through this program, participants can expect to gain desirable field skills and training while addressing coastal resilience needs in the Lowcountry.

Service projects focus primarily on **Habitat Restoration and Green Infrastructure** (e.g. build rain gardens, construct and maintain recreational trails, plant marsh grass, fabricate oyster reefs, construct living shorelines, monitor water quality, and more!)
